

INDUSTRY USE CASES ON KUBERNETES

- Modernisation : Migrating the code from centralised version system to distributed version system

CVS → Git

- ↳ Distributed works better if there is big team
- ↳ Easy to create branches in Git
- ↳ Git UI gives more clear picture of the ^{reps} repository
- ↳ Best API implementation in Git
- ↳ Git is easy to reconcile.
- ↳ Code merges bet the branches.
- ↳ CVS works on a file level, Git works on a repo/module level.

- 2 ways for conversion

- ↳ overimport (cmd)
- ↳ CVS 2git (tool)

or

- Integration with Jenkins

- In production we have different environment.

- CPU limit is Imp

- CPU leak is when we don't set CPU limit & our program ~~as~~ requests for more and more CPU requests.
